

UN Vienna CARE & SHARE is a newly established VIC Club/Association aiming at reaching the UN Millenium goals and protecting the Earth, with a focus on children in challenging situations worldwide.

If you donate 10 € a month, we can build a school every month!

About 5000 staff members work and earn their salaries in the VIC. In some developing areas of the world we can build a primary school for about 100 children for 50,000 € or less.

Children are the future and their wellbeing and education is one of the key elements to create our living conditions on Earth. This is why we decided to focus on children in need.

The Earth is all humanity really has for free and it deserves respect and care. We consider and promote sustainability factors when supporting projects.

You always wanted to contribute to charities, but never found the right one?

UN CaSha has minor administrative and marketing costs and we rely on YOUR word of mouth to spread our message. Big charity organizations spend up to 90% of donations on administration and marketing, where big companies make profits and pay salaries. We spend your donations for the direct benefit of children. We support children, families and small projects directly and unbureaucratically.

You are working and cannot commit to a full-time support, but might want to work on a project here or there. Your time, effort, enthusiasm and experience are appreciated in assisting with particular projects over a timeframe suitable for you. join us for a trial period and see for yourself how it works! We will issue regular project listings where you can volunteer for a selected area or project.

Control factor: we intend to exercise control over the proper use of our funds by establishing a local control mechanism. We want to do it better, give us a chance!

You know of children in need and do not know how to help them?

Submit a project description to us and we will verify and, upon acceptance, send it to our supporters to solicit assistance. We want to assist directly and unbureaucratically. We support exclusively children in challenging conditions worldwide. Our focus is on small existing projects or the creation of new projects.

YES WE CAN

MAKE THE WORLD A BETTER PLACE FOR ALL
